

Battery Cabinet Systems

RANGE SUMMARY

Introduction to . . . DataSafe® HX Battery Cabinet Systems

data safe[®]
HX

DataSafe® HX range of valve regulated lead acid batteries has been designed to offer superior solutions for Uninterruptible Power Supply markets.

The HX battery cabinet offering now makes the DataSafe HX battery the ideal choice to optimize your UPS system installation, while offering flexibility in allowing customized options that enables you to design the perfect system for your particular application.

DataSafe HX battery cabinet systems are factory pre-wired to minimize installation time. With a space efficient footprint, transport to the installation site is simplified and overall footprint is optimized.

The cabinet systems are UL1778 listed and approved for UBC seismic zone 4 installations as a standard feature, allowing installation in the most demanding and critical applications.

DataSafe HX batteries complete the high quality system by offering a superior performance UPS battery built to the highest standards in the industry.

Features & Benefits

- ETL, CSA and UL1778 listed
- UBC seismic Zone 4 standard
- Factory pre-wired to reduce installation time
- Flexible design simplifies customization for options including circuit breakers and casters for specific customer needs
- Dual DC rated fuses per cabinet are standard
- Space efficient design reduces footprint requirements
- Hinged front doors and removable rear panels simplify maintenance routines
- Easily upgradeable to include battery monitoring systems
- Multiple cabinet colors available to match UPS equipment
- Several knockout locations to accommodate specific site wiring needs
