

LCR AND LCY LEAD-CALCIUM

FOR SWITCHGEAR AND CONTROL APPLICATIONS

Capacities from 900 to 2400 Ampere-hours

C&D Technologies flooded batteries are engineered to provide superior performance and reliability over the life of the product. These batteries are designed using proprietary techniques and quality components and materials for reduced maintenance and extended battery life.

APPLICATIONS

- Electric Power Generation Facilities
- Nuclear Power Plants
- Emergency Systems
- Manufacturing Facilities
 - Assembly Lines
 - Process Controls
- Petrochemical processing plants
- Pipelines

FEATURES & BENEFITS

- Electrical testing to 100% capacity of all battery cells prior to shipping ensures performance of every battery string upon delivery
- Long life positive plates cast with a proprietary process and alloy
- Waterbath charging results in consistently formed plates for reliable performance out of the box (no cycling required in the field)
- Suspended positive plates permit free growth without pressure on jar and cover
- Nuclear versions qualified per IEEE 535 for Class 1E nuclear applications

SAFE OPERATION

- Flame-retardant covers enhance battery plant safety with self-extinguishing properties, LOI>32%, UL 94V-0
- Low-evaporation, flame-arrester vent to extend watering intervals and prevent external sparks from reacting with the hydrogen inside the cell

COST SAVINGS

- Transparent container allows visual inspection of plates
- Soft rubber post seal minimizes stress on post reducing maintenance requirements
- Computer controlled heli-arc welded post seals result in consistent and reliable seals for less maintenance and longer product life

SPECIFICATIONS

Plates	LCR	LCY
Dimensions		
Height	15.00 in (381 mm)	15.00 in (381 mm)
Width	12.00 in (305 mm)	12.00 in (305 mm)
Positive Thickness	0.312 in (7.9 mm)	0.250 in (6.4 mm)
Negative Thickness	0.210 in (5.3 mm)	0.180 in (4.6 mm)
Outside Negative Thickness	0.130 in (3.3 mm)	0.130 in (3.3 mm)
Electrolyte height above plates	2.88 in (73 mm)	
Sediment space	0.63 in (16 mm)	
Electrolyte @ 77°F (25°C)	Sulfuric acid, 1.215 specific gravity nominal	
Electrolyte withdrawal tubes	Two per cell optional	
Recommended Float voltages	2.20 - 2.25 volts per cell	
Container	Thermoplastic, transparent (SAN)	
Cover	High-impact, flame-retardant thermoplastic, with tongue-and-groove seal. Flammability ratings: UL 94-V0; ASTM D-635 self-extinguishing.	
Separator	Microporous with fiberglass retaining mat	
Vent Systems	Flame-arrester with dust cover	
Terminals 2LCR-13 and 2LCR-15 LCR-13 through LCR-17 LCR-19 through LCR-33	Two, 1-in square copper-inserted posts with dual-bolt holes per cell Four, 1-in square lead posts with 2 cross-bolt holes Four, 1-in square copper-inserted posts with single-bolt holes	
LCY-35 through LCY-39	Six, 1-in square copper-inserted posts with single-bolt holes	
Optional container	Transparent, polycarbonate. Flammability ratings: UL 94-V2; ASTM D-635, self-extinguishing	

Model	Unit dimensions in (mm)			Unit wt. lbs (kgs)		Electrolyte per cell lbs (kgs)
	L	W	H	Net filled	Domestic packed	
2LCR-13	12.10 (307)	14.12 (359)	22.70 (577)	352 (160.0)	372 (169.1)	55 (22.0)
2LCR-15				380 (172.7)	401 (182.3)	52 (23.6)
LCR-13	7.62 (194)			196 (88.9)	211 (95.7)	65 (29.5)

LCY-37				420 (190.5)	443 (200.9)	92 (41.7)
LCY-39				438 (198.7)	461 (209.1)	90 (40.8)

For information on battery racks, please refer to brochure 12-560.

What Does The C&D Powercom Battery Selection Application Do?

The C&D Powercom Battery Selection Application allows users to quickly calculate many values essential for the proper selection of standby battery product via an online application. This allows users to access all the information they need to size and select the proper battery without having to download and install software.

This includes the ability to:

- Select batteries based on complex step loads and generate IEEE-485 Sizing Work Sheets.
- Select batteries based on constant current loads.
- Select batteries based on constant power loads.
- View and customize rating tables.
- Perform battery run time analysis.

Access the C&D Powercom Battery Selection Application at www.cdstandbypower.net

Notes:

- Rack Lengths for other batteries can be calculated by the formula:
Number of units per tier or step x (L+0.5 inches)- 0.5 inches = total rack length, where "L" is the length of battery jar or cell in inches.
- See Section 12-560 for information about seismic-rated racks.
- Rack width does not include cross bracing. Increase width by 0.5 inches (12.7mm) when this dimension is critical.
- Height is the height to the top of the battery installed on this rack. See Section 12-560 and rack drawings for further information.
- Additional ratings and application information is available in the Battery Selection Program at www.cdstandbypower.net
- Racks qualified to IEEE-693 and IBC (RDC Series) are available. Contact your C&D representative for details.

LONG DURATION SERIES

For more than 100 years, C&D Technologies has fulfilled the vision of its founders by designing and manufacturing the finest integrated standby power products. We continue to meet the technological challenges of the future. C&D creates powerful solutions for a world in motion. **We can create solutions for you!**

C&D Technologies' provides power solutions and services for the telecommunications, uninterruptible power supply (UPS), energy & infrastructure as well as emerging markets. C&D Technologies engineers, manufactures, sells and services fully integrated standby backup batteries and power solutions to insure that power to the customer's critical application is uninterrupted.

Today C&D operates Worldwide with production facilities in USA, Mexico and China. We continue to be the leader in high quality, long lasting batteries for all applications. Our continued success is due to our Products, our People, our Sales Partners as well as our Loyal Customers.
